The Burden of Diabetes in Oregon

Diabetes is an epidemic in the United States. According to the Centers for Disease Control and Prevention (CDC), over 37 million Americans have diabetes and face its devastating consequences. What's true nationwide is also true in Oregon.

Oregon's diabetes epidemic:

- Approximately 322,333 people in Oregon, or 9.5% of the adult population, have diagnosed diabetes.
- An additional 93,000 people in Oregon have diabetes but don't know it, greatly increasing their health risk.
- blindness—and death. There are **1,097,000 people in Oregon**, 33.5% of the adult population, who have prediabetes with blood glucose levels that are higher than normal but not yet high enough to be diagnosed as diabetes.
- Every year an estimated 25,017 people in Oregon are diagnosed with diabetes.

Diabetes is expensive:

People with diabetes have medical expenses approximately 2.3 times higher than those who do not have diabetes.

- Total direct medical expenses for diagnosed diabetes in Oregon were estimated at \$3.1 billion in 2017.
- In addition, another \$1.2 billion was spent on indirect costs from lost productivity due to diabetes.

Improving lives, preventing diabetes and finding a cure:

In 2023, the National Institute of Diabetes and Digestive and Kidney Diseases at the National Institutes of Health invested \$1,963,060 in diabetes-related research projects in Oregon.

The **Division of Diabetes Translation** at the CDC provided \$1,913,529 in diabetes prevention and educational grants in Oregon in 2021.

Diagnosed diabetes costs an

each year.

estimated \$4.3 billion in Oregon

The serious complications include

heart disease, stroke, amputation,

end-stage kidney disease,
